PROFESSIONAL SUMMARY

Full Stack Software Engineer with 4+ years of professional experience across healthcare, Web3, and SaaS. Backend focus on Java / Spring Boot and Node.js, frontend on TypeScript / React, with production experience on serverless AWS and Kubernetes. Swiss citizen based in Basel, currently completing civilian service, available from 1 January 2027.

TECHNICAL SKILLS

Languages: Java, TypeScript / JavaScript, SQL

Backend: Spring Boot 3.x, Spring Security, Hibernate / JPA, Node.js, NestJS

Frontend: React, Next.js, React Native, Redux / Redux Toolkit, Zustand, TanStack Query

APIs & Architecture: REST, GraphQL, microservices, serverless, multi-tenant systems

Databases: PostgreSQL, MongoDB, MySQL, Oracle

DevOps / Cloud: AWS (Lambda, SAM), Docker, Kubernetes, Rancher, Jenkins, GitHub Actions, Git

Testing & Build: JUnit 5, Mockito, Jest, Maven, Gradle

Methodologies: Agile / Scrum

EXPERIENCE

Zivildienst (Swiss Civilian Service)

Jan 2026 – Dec 2026

Civilian service assignment

Switzerland

- Mandatory Swiss civilian service. Employment contract with Goodcode SA remains active; available for a new role from 1 January 2027.
- **Kitchen & Activities Assistant** – Basel Lighthouse, Basel (*Sep – Dec 2026*)
- **Administrative Assistant** – Casa Anziani di Sementina, Sementina (*Jul – Aug 2026*)
- **Caretaker Assistant** – Casa Anziani Comunale di Bellinzona, Bellinzona (*Jan – Jun 2026*)

Goodcode SA

Apr 2024 – Present

Full Stack Software Engineer • 80% until Aug 2025, 100% since Sep 2025

Manno, Switzerland

- Architected EdilControl v2, a construction site management platform, on a serverless AWS stack (Lambda + SAM). Built a fully automated multi-tenant deployment pipeline triggered by a single GitHub Actions publish, replacing a 5-minute manual process of multiple error-prone steps and provisioning backend, frontend, database and related services from one parameterizable template.
- Contributed to Freename, a Web3 e-commerce platform for blockchain domain sales: implemented on-chain custody and multi-chain minting, and rebuilt the automated PDF invoice generation pipeline, eliminating recurring critical bugs and significantly improving generation time.
- Built a standalone microservice for dynamic PDF generation from HTML templates, now reused across several internal projects, with unit and integration tests (JUnit 5, Mockito, Jest) wired into the CI/CD pipeline.
- Owned release management and ongoing support for the company mobile application, ensuring regular updates, bug fixes and stability.
- Tech Stack: TypeScript, React, Next.js, NestJS, Spring Boot, AngularJS, PostgreSQL, AWS Lambda, AWS SAM, GitHub Actions, Docker.

Elysium (Startup)

Dec 2022 – Jan 2024

Front-End Developer • part-time

Lugano, Switzerland

- Built a cross-platform mobile wallet for Android and iOS, letting users manage fiat currencies and cryptocurrencies from a single interface.
- Tech Stack: TypeScript, React Native, Expo, Redux.

Ente Ospedaliero Cantonale (EOC)
Full Stack Software Engineer • 60% alongside BSc

Sep 2021 – Apr 2024
Bellinzona, Switzerland

- Designed and implemented a fully custom client for managing Flowable BPM processes, adopted hospital-wide across 50+ departments for medical consultations, insurance requests, inpatient management and staff task coordination. Led the backend migration from Node.js to Spring Boot to meet the resulting scale and reliability requirements.
- Contributed to the Electronic Health Record (EHR) system on both frontend and backend, improving UX, code quality and performance, with automated tests on critical clinical flows to support reliability and compliance.
- Developed an internal developer tooling web app (Next.js) used by the whole engineering team to manage and resolve EHR tickets, streamlining support workflows.
- Tech Stack: TypeScript, React, Next.js, Spring Boot, Node.js, MongoDB, Redux, Feathers, MUI, Jenkins, Docker, Rancher, Kubernetes.

Ente Ospedaliero Cantonale (EOC)
Trainee Software Developer (4-year apprenticeship)

Sep 2017 – Aug 2021
Bellinzona, Switzerland

- Four-year apprenticeship within the EOC engineering team. Final thesis project: digitalized REGA emergency rescue reports and integrated them into the EOC internal infrastructure.
- Tech Stack: TypeScript, React, Node.js, MongoDB, Redux, Feathers, MUI, Docker.

EDUCATION

SUPSI
Bachelor of Science in Computer Science

Sep 2021 – Aug 2025
Lugano, Switzerland

- Completed while working part-time as a software engineer.

Centro Professionale Tecnico (CPT)
AFC – Software Developer with Federal Diploma

Sep 2017 – Jun 2021
Locarno, Switzerland

PROJECTS

Cross-chain NFT Marketplace | *TypeScript, Next.js, Solidity (Hardhat), Web3.js, AWS*

2025

- Marketplace with listing, bidding/auction flows and multi-chain wallet integration. University project.

LANGUAGES

Italian: native • **English:** C1 • **German:** A2, actively improving through daily immersion in Basel
